The Vietnam Center &
Sam Johnson Vietnam Archive™

The CDEC Research Collaboration Portal and the Legacies of War Project

Maximizing Collaborative Research to find the Missing,
Return the Legacy, and enhance the
Bilateral Relationship between the U.S. and Vietnam

Presentation by Stephen Maxner, Ph.D., Director
Vietnam Center and Sam Johnson Vietnam Archive
Texas Tech University

TEXAS TECH UNIVERSITY

The Vietnam Center &
Sam Johnson Vietnam Archive™

CDEC Research Collaboration Portal (RCP)

- With the Virtual Vietnam Archive at Texas Tech as the foundation, the CDEC RCP will allow the Legacies of War project research team members to engage in more efficient, effective, and focused research using the unique archival holdings of the Vietnam Archive at Texas Tech
- The purpose for the CDEC RCP is to provide a common and centralized location for CDEC document access, document review, basic document analysis, metadata entry, communication, information management, information sharing, and open and transparent collaboration between research team members at both Texas Tech University and Harvard University

TEXAS TECH UNIVERSITY

The Vietnam Center &
Sam Johnson Vietnam Archive™

CDEC Research Collaboration Portal (RCP)

- Using a common and centralized system for document access and metadata entry is essential to both short-term and long-term VMIA/Legacy project success
- The CDEC Collection and other historical document collections that are the textual foundation for this project are sizable and contain millions of document records and pages
- In order to efficiently and effectively review and tag that much material as relevant or not relevant to this project, research team members need to engage in active review and metadata tagging as they review
- By doing so, they will contribute to the short term-mission of identifying mission critical documents that contain MIA information and/or legacy artifacts while also contributing to the long-term mission of creating a more complete and more robust dataset that can be used for many years to come

Welcome to the VMIA Research Collaboration Portal

This site is dedicated to collaborative research that will help identify and tag documents contained within the Combined Document Exploitation Center Collection (CDEC) and related US military records.

The mission is to allow our organizational partners to login and access CDEC materials, review them, and add additional metadata, search tags, and related information that can then be shared in real time with other USMIA and VMIA researchers/teams via the Internet. The goal is to identify actionable information that can be tagged and shared across all research teams, fostering better and more efficient communication, information sharing, and MIA case resolution.

For now, this portal is controlled access and is not open for use by public researchers or volunteers. If you are a member of our collaborative partners, please click the Log In/Sign Up button to register and set up an account. If you have questions, please contact us vnca@ttu.edu.

Research Collaboration Portal

- The CDEC RCP uses the same ArchivesSpace database architecture that drives the Virtual Vietnam Archive – an online database that provides public access to more than a million documents and artifacts and more than 10 million pages of digitized Vietnam War historical documents from the Vietnam Archive Collections
- The homepage for CDEC RCP provides basic information about the site and invites guests to apply for login credentials, which are provided by invitation only and with the approval of VNCA staff

Welcome to the VNCA's CDEC Research Collaboration Portal

Thank you for helping us to identify and tag CDEC and related US military records with valuable information that can be used to help account for the missing from the war and return important legacy artifacts to Vietnamese families.

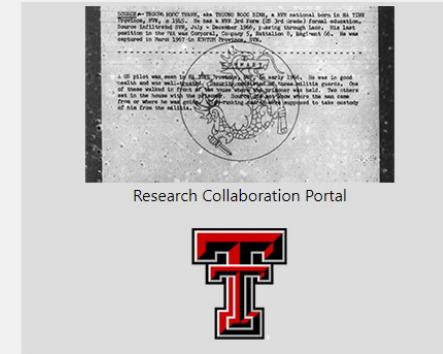

[Start using the CDEC Research Collaboration Portal](#)

Below are links to get you started (or click on Help above).

How-to

[Style Guide - English / Vietnamese](#)

[Video Tutorial](#)

Research Collaboration Portal

- By using invitation only and credentialed access, the VNCA has established a secure data entry system that will only allow authorized users to enter metadata and information for CDEC and other records after they have received training by VNCA staff
- CDEC RCP access is also conditioned on user acceptance of the terms of use for the CDEC RCP with continued access dependent on adherence to the terms of use
- After a user accepts the terms of use and is approved and is granted login permissions and credentials, they are taken to a new screen that will include links to additional resources to include user guides and tutorials
- To start using the portal, users click the link to Start using the CDEC RCP

- The search page is designed with intentional simplicity while allowing for selective targeted searches to include date limiters, CDEC reel numbers, and whether documents have been reviewed to contain MIA/Legacy Information
- Additional research tools include access to the unique VNCA ArcGIS and other mapping tools and resources to include wartime tactical maps of Vietnam
- All CDEC RCP pages are very flexible and easily modified and VNCA staff have the expertise to quickly add additional search features and capabilities once we receive feedback from our collaborating partners at Harvard University and as project needs evolve over time

(OPEN FILLED IN)

EVALUATION WORKSHOP

Date : 8 Apr 67
Log # : 05-3443-67
Subject : Notebook of Hai Truong aka Hoan Civilian Cadre of Phuoc Long Province
1 doc, 185 Page (s), 5 x 8 inches, (handwritten)
Circumstance of capture : Unit : D/2/7 Day 3/1st Air Cav Div
Date : 30 Mar 67 Area : TT2526
Type : , , , , . Summary : , Extract : , Translations

HIGHLIGHTS:

Notebook, with entries by Hai Truong, dated from Jan 65 to Mar 67, reveals the following: Hai Truong aka Hoan, native of Thanh Hoa Province, was an officer of Border Defense Unit in NVN. Truong's wife, Nguyen Thi Ha, lives in Hai Loc Village, Hau Loc District, Thanh Hoa Province, NVN.

Truong was reassigned to an U/I group to infiltrate into NVN as follows:

- 9 Apr 65 : Started the infiltration trip
- 31 Jul 65 : Arrived in NVN, area 1101
- 1 Aug 65 : Reached Hill 900
- 2 Aug 65 : Crossed the border at Tuyen Stream, near Ben Hiep River
- 1 Sep 65 : Reached Laoian territory and after that entered Cambodia and lived in the jungle in the border areas.
- 5 Sep 65 : Passed Road # 19, crossed Cha Lak River in Cambodia and, after three weeks walking

Notebook of Hai Truong aka Hoan Civilian Cadre of Phuoc Long Province

Personal entries are dated January 1965 to March 1967

Hai Truong aka Hoan is a native of Thanh Hoa Province and served as an officer in of Border Defense in North Vietnam

Hai Truong's wife: Nguyen Thi Ha of Hai Loc Village, Hau Loc District, Thanh Hoa Province, DRV

The body of the Notebook covers significant details of Hai Truong's travels from

VMIA Subjects:

- Grave
- Capture
- K.I.A.
- Prisoner of War
- Remains
- Unit Roster

Legacy Subjects:

- Diary
- Letter
- Evaluation
- Award
- Commendation

DPAAC Subjects:

- Grave
- Capture
- K.I.A.
- Prisoner of War
- Remains

VMIA/Legacy Reference Number: **DPAAC Reference Number (REFNO):**

Hai, this is a high value legacy artifact - a detailed diary that outlines the personal experiences of a North Vietnamese Army Officer. While it is not yet clear of the notebook was recovered from the body of Hai Truong, if he remains unaccounted for from the war, it is highly likely his remains are buried near the site where the notebook

CONTAINS VMIA/Legacy Information DOES NOT contain VMIA/Legacy Information

Captured Documents (CDEC): Unknown Interrogation Source, Log Number

0157-0153-000.pdf

Open In New Window

View Record Details

The screenshot shows a document review interface. On the left, there is a vertical sidebar with thumbnails of documents. The top thumbnail is highlighted with a blue border. On the right, the main area displays a detailed view of a document. At the top of this area, there are several buttons: a red button for the PDF file, a green button for opening in a new window, and a blue button for viewing record details. Below these buttons, there is a toolbar with zoom controls (1%, 57%, +, -), a search bar, and other document management tools. The main content area shows a scanned document titled "EVALUATOR'S # _____" and "KIN (ARMED FORCED IN)". The document contains handwritten and typed information about a subject named Hai Truong, including his rank as a Captain, his unit as D/2/7 Cav 3/lat Air Cav City, and his area as ST1526. It also includes a summary section and a note at the bottom detailing his movements from January 1965 to September 1965.

- On the left side of the screen is the document review window
- This includes links to the string of site pages
- Link to open the document in a separate window to allow for easier document scaling and dual monitor data entry
- Link to open the detailed document record data in a separate window to allow access to additional document metadata already collected
- The document itself to include thumbnails allowing for easy and immediate document review and data entry

- On the right side of the screen is the data entry form
- This includes a transcription window where research team members will provide detailed information transcribed from the original text of the document
- VMIA Subject tags that identify both known and potential subjects to include graves, capture, KIA, POW, remains, and unit rosters
- Legacy Subjects that identify known subjects to include diaries, letters, evaluations, awards, and commendations
- We have included “DPAA Subjects” as well since we know there will be documents that contain USMIA related data and we anticipate adding those tags when we identify them to assist with that complimentary mission

The screenshot shows a user interface for data entry. At the top, there's a dark header bar with links for "Search Project", "Control Panel", "Help", and "Contact Us". Below the header is a transcription window containing text about a notebook belonging to Hai Truong. The text describes him as a native of Thanh Hoa Province, serving as an officer in Border Defense in North Vietnam, and his wife being Nguyen Thi Ha. A note states the body of the notebook covers significant details of his travels from January 1965 to March 1967. Three groups of subject tags are listed at the bottom:

- VMIA Subjects:** Grave, Capture, K.I.A., Prisoner of War, Remains, Unit Roster
- Legacy Subjects:** Diary, Letter, Evaluation, Award, Commendation
- DPAA Subjects:** Grave, Capture, K.I.A., Prisoner of War, Remains

- We include a field for a VMIA/Legacy Case Reference Number in the event such a numbering protocol is established
- DPAA Reference Number (REFNO) field for documents that can be linked to known USMIA case files
- Comments text box that allows research team members to enter document related information document analysis they wish to track or special notes and information worthy of being shared with others
- Research team members will indicate whether the document does or does not contain MIA/Legacy Artifact information, effectively tagging the document as reviewed and worthy of continued evaluation or if it is irrelevant and can be ignored in future searches
- The Save button will save all data entered

VMIA/Legacy Reference Number: _____

DPAA Reference Number (REFNO): _____

This is a HIGH VALUE LEGACY ARTIFACT - a detailed diary that outlines the personal experiences of a North Vietnamese Army Officer. While it is not yet clear if the notebook was recovered from the body of Hai Truong, if he remains unaccounted for from the war, it is highly likely his remains are buried near the site where the notebook was found.

- Clicking the Item Number opens the document in the CDEC RCP data entry form, allowing for review of previous information entered and the entry of additional information as needed/warranted
- The database record and additional comments can then be shared easily and efficiently with the research team member via the internal Send function
- This same feature allows for enhanced and ongoing collaboration on specific documents between multiple users since the RCP tracks each individual team member comments, building a detailed record of contributions over time while preserving the original document record data as well as each research team members individual contributions

Welcome to the VMIA Research Collaboration Portal

This site is dedicated to collaborative research that will help identify and tag documents contained within the Combined Document Exploitation Center Collection (CDEC) and related US military records.

The mission is to allow our organizational partners to login and access CDEC materials, review them, and add additional metadata, search tags, and related information that can then be shared in real time with other USMIA and VMIA researchers/teams via the Internet. The goal is to identify actionable information that can be tagged and shared across all research teams, fostering better and more efficient communication, information sharing, and MIA case resolution.

For now, this portal is controlled access and is not open for use by public researchers or volunteers. If you are a member of our collaborative partners, please click the Log In/Sign Up button to register and set up an account. If you have questions, please contact us vnca@ttu.edu.

Research Collaboration Portal

- Use of the VNCA CDEC RCP will allow for open and transparent collaboration between research team members at Texas Tech University and Harvard University, will maintain and allow transparent access to a record of the original document data as well as the contributions of each individual team member, and will allow for Quality Control over the data entered by team members
- Of equal importance, this system will allow the VMIA and Legacies of War project to reach its goals of efficiently and effectively identifying potential grave and remains locations of VMIA while also identifying and returning precious legacy artifacts to veterans and their families, all while promoting and supporting a better bilateral relationship between the United States and Vietnam
